

Concerned Hughes County Landowners and Operators

Hughes County Commissioners:

The development of massive industrial wind parks has continued to spread across the nation including our great state. As a landowner/ operator in Hughes County, I recognize the need for our local government board to establish and maintain responsible ordinances to protect existing businesses, family farms, rural homes, and operations that have been a staple of Hughes County for generations.

I commend the Hughes County Planning and Zoning Board for recognizing current ordinances are inadequate for the potential development of 500'-600' tall, 2.5-3 megawatt industrial wind turbines. The Planning and Zoning Board's June 22nd unanimous vote to recommend 1 mile setbacks from occupied residences and a maximum noise disturbance level of 40 decibels will greatly minimize the exposure Hughes County residents will be forced to live with. Moreover, implementing proper haul road agreements between Industrial Wind companies and the county will provide farmers' and ranchers' road systems that are essential to go to market without interruption. I also recognize there needs to be a decommissioning tool built into the ordinance. To rely on other levels of government, such as the PUC, to establish the correct funds to take IWT's down after their short lifespan of 12-15 years is over is not in the best interest of Hughes County.

When addressing the enormous environmental footprint created by today's wind turbines and setback distances, please recognize the multitude of negative effects associated with them including but not limited to low frequency noise, audible noise, infrasound, shadow flicker, property devaluation and the overall aesthetic devaluation of the landscape. I am currently not exposed to these negative effects. Any amount of exposure is an invasion on my safety, health and welfare.

Sincerely,

Sign

I commend the Hughes County Planning and Zoning Board for recognizing current ordinances are inadequate for the potential development of 500'-600' tall, 2.5-3 megawatt industrial wind turbines. The Planning and Zoning Board's June 22nd unanimous vote to recommend 1 mile setbacks from occupied residences and a maximum noise disturbance level of 40 decibels will greatly minimize the exposure Hughes County residents will be forced to live with. Moreover, implementing proper haul road agreements between Industrial Wind companies and the county will provide farmers' and ranchers' road systems that are essential to go to market without interruption. I also recognize there needs to be a decommissioning tool built into the ordinance. To rely on other levels of government, such as the PUC, to establish the correct funds to take IWT's down after their short lifespan of 12-15 years is over is not in the best interest of Hughes County.

When addressing the enormous environmental footprint created by today's wind turbines and setback distances, please recognize the multitude of negative effects associated with them including but not limited to low frequency noise, audible noise, infrasound, shadow flicker, property devaluation and the overall aesthetic devaluation of the landscape.

Sincerely,

George Sperry

Concerned Hughes County Landowners and Operators

Hughes County Commissioners:

The development of massive industrial wind parks has continued to spread across the nation and including our great state. As a landowner/ operator in Hughes County, I recognize the need for our local government board to establish and maintain responsible ordinances to protect existing businesses, family farms, rural homes, and operations that have been a staple of Hughes County for generations.

I commend the Hughes County Planning and Zoning Board for recognizing current ordinances are inadequate for the potential development of 500'-600' tall, 2.5-3 megawatt industrial wind turbines. The Planning and Zoning Board's June 22nd unanimous vote to recommend 1 mile setbacks from occupied residences and a maximum noise disturbance level of 40 decibels will greatly minimize the exposure Hughes County residents will be forced to live with.
