Subject: Wind farm

To the Hughes Co Board of Adjustment:

I'm writing in concern of the ordinances for wind farms in Hughes County. Wind farms have the potential to affect the nearby non-participant(s) ability to enjoy and operate as usual their land whether it be farming, recreational, development, rural home, etc. The participant(s) have, in signing a contract, agreed to living and operating their land in an industrial electrification facility. Consideration should be given to the non-participant(s). Sully County has under revision its county ordinances. It has been proposed that wind turbines may not be allowed within a distance of not less than 21,040 feet from a non-participant(s) property line.

Sincerely,

Gail Tennant
