Board of Adjustment

We had been approached by a Wind company 20 yrs ago. North Bend Wind Company sent a representative to our house 6 yrs ago when we indicated we do not want a huge wind-tower on or near our property destroying our beautiful landscape.

Our opposing reasons are

1. Roads on property for maintenance!
2. The noise they create $\frac{1}{2}$ to 1 mile from private residence!
3. Flashing lights at night!
4. Shadow of turbine in bright sunlight causes vertigo!
5. Turbines hit migratory birds!

6. They leak oil which
will be in the soil!
7. Worn out turbines are
disposed and buried in
many states and can not be
recycled!
